CHOOSE YOUR WINDOW STYLE & FRAME TYPE:

A

Retrofit

These are typically used to replace existing aluminum windows.

Block Frame

Block Frames are commonly used to replace existing wood windows.

Nail-on

Used on new construction or remodeling where stucco will be applied after window installation.

Screens are included with all window purchases and vary from different windows.

Weep holes are located at the bottom of the sash frame & allow water to escape.

SLIDING WINDOWS

01

Sliding windows open horizontally and do not take up much space in the home. This makes them ideal for walkways, porches, patios or other places where you wouldn't want a window to protrude.

Our state-of-the-art design ensures they will add style as well as functionality to your home.

Horizontal sliding windows glide open with little effort & are faster to open than crank-style awning or casement windows.

The sliding sash can be easily removed to clean the exterior glass from inside your home.

SINGLE HUNG WINDOWS

02

Single Hung windows open vertically and do not take up much space in the home. This makes them perfect for walkways, porches, patios or other places where you wouldn't want a window to protrude.

They raise from the bottom for ventilation and when closed, provides superior structural integrity & resistance to wind.

The lower sash can be easily removed to clean the exterior glass from inside your home.

Vertical sliding windows glide open with little effort & are faster to open than crank-style awning or casement windows.

CASEMENT & AWNING WINDOWS

03

They are designed contemporary in style, allowing more light to enter the window, while also providing a larger view. Both compliment the simplicity of modern design and offer increased ventilation by opening up the entire glass area.

Casement and awning windows can be assembled in the following variations:

All our casement and awning windows are assembled with heavy duty hinges & arms.

These are extremely durable & make opening & closing windows a breeze.

These hand cranks are designed so that when they are not in use, they are easily positioned back into a stream-line shape.

SLIDING PATIO DOORS 04

Our sliding patio doors are engineered to operate with ease. Their heavy duty construction & hardware allows for even the largest size door to glide open with little effort.

Our patio doors are sleek & less obtrusive than most designs available on the market today.

The two-point lock system is made to withstand great force to keep you and your home safe and secure.

You can add your personal touch by adding decorative glass, grid pattern or color. Below are the configurations for both the sliding patio door and French sliding door.

Exterior View

XO

From Left to Right Side.

OXOL

Slide From Center to Left Side.

OXXO

Sliding From Center to Sidelites.

High precision, slide adjust rollers with composite wheels make opening & closing your doors a breeze!

FRENCH SWING DOORS 05

Compression-seal Technology

When the wind is blowing strong, the sash is pushed against the compression seals optimizing the air and water performance of the door.

This door qualifies for coastal applications even in hurricane-prone areas.

Multi-point locking hardware assures consistent compression on the seals all around the perimeter of the sash and frame.

LXFD-XR

Single French Door.

LXFD-XXL

Double Opening French Door.

LXFD-OXXOL

Double Opening French Door With Sidelites fixed.

Double Opening With Sidelites Fixed FrenchSwing Door,w/ Picture at Top.

Low Maintenance

Only occasional cleaning with soap and water is needed to keep the surfaces looking like new, even years after installation. Heavy- duty hinges have passed cycle testing of up to 100,00 opening and closing cycles without any need for adjustments.

BAY & BOW WINDOWS

06

With Bay & Bow Windows, you can create a new dimension to your living space.

Bay windows are created by joining three windows together, generally the center window is fixed with fully operational single-hung or casement windows angled on either side.

High-quality headboards and seat boards provide superior performance and durability.

Bow windows consist of four or more windows joined together to form graceful curve.

It's an elegant way to broaden your view and allows for lots of ventilation.

We offer plenty of variation of both styles of windows.

with 15° Mullions

GARDEN WINDOWS

07

Garden windows extend out from the house and generally have side vents and “an interior shelf which is perfect for plants or herbs. Our flexible design includes single hung side vents which open easily for ventilation.

The window joints are designed to give maximum stability to withstand weight while still looking seamless.

The bottom shelf provides a barrier against extreme temperatures which will protect your home from the heat or cold. Garden windows will also give the appearance of a larger room inside your house.

SELECT YOUR GLASS

B

LV Windows offers many glass options. Whatever your climate, we make it easy for you to choose the perfect glass for your home. The standard glass we offer is LoE²-270, or you can upgrade to LoE-366. You also have the choice of gray or bronze tinted glass and diffused glass. We have several styles to choose from and can match any diffused glass pattern on the market today.

Why upgrade to

LoE-366?

Cardinal Glass Industries Inc. introduces the ultimate performance glass, LoE-366.

LoE-366 provides the highest levels of year-round comfort and energy savings, for all climates. The secret? A triple layer of silver coating on the glass.

This will protect your furniture, carpet, curtains and fabrics in the home as well as keep the heat and cold weather out.

Energy- efficient windows will save you a bundle and help the environment at the same time.

Duralite® Spacer is the technology inside our Windows & Doors

Truseal is a cost - effective system offering superior thermal efficiency. Truseal insulates the frame & edge of glass 90% better aluminum spacer bars.
